Project Name	House Rent
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	<i>Identify yourself as a customer (user) of the House Rent platform.</i>	A tenant looking for a rental house .
I'm trying to	<i>Tell us your main goal or what you want to achieve.</i>	Find a safe, affordable, and suitable rental house that meets my needs quickly and easily.
but	<i>Describe the obstacle or difficulty you are facing.</i>	I find it difficult to find verified properties , compare options, and get accurate information in one place.
because	<i>Explain why this obstacle exists or what's causing it.</i>	Rental information is scattered across different platforms , many listings are not verified or updated , and the process is mostly manual and time-consuming .
which makes me feel	<i>Share how this situation makes you feel emotionally.</i>	Frustrated, confused, and unsure about making the right decision while searching for a rental house.

Example:

Problem Statement (PS)	PS-1	PS-2	PS-2
I am (Customer)	A tenant looking for a rental house.	A landlord who wants to rent out a property.	A real estate agent/broker who helps in renting properties.
I'm trying to	Find a safe, affordable, and verified rental house quickly and easily.	List my property online and manage bookings efficiently.	Help tenants find suitable houses and landlords rent out quickly.
But	I find it difficult to identify genuine properties and compare available options.	Managing property listings, tenant inquiries, and bookings manually is time-consuming.	I have to deal with multiple calls, manual tracking, and time-consuming follow-ups.
Because	Rental information is scattered across different platforms, and many listings are not verified or regularly updated.	There is no centralized platform to manage listings, bookings, and communication with tenants.	There is no efficient system to manage leads, property details, and client communication.
Which makes me feel	Frustrated, confused, and uncertain while choosing a rental house.	Stressed and inefficient in managing my rental property.	Overwhelmed and unable to serve clients effectively.
