

1. Roles and Responsibilities

Description

The House Rent Management System follows a **Role-Based Access Control (RBAC)** mechanism. Different users are assigned different roles and permissions to ensure secure and efficient system operations. The three primary roles in the system are **Renter (Tenant)**, **Owner**, and **Admin**.

2. Renter (Tenant)

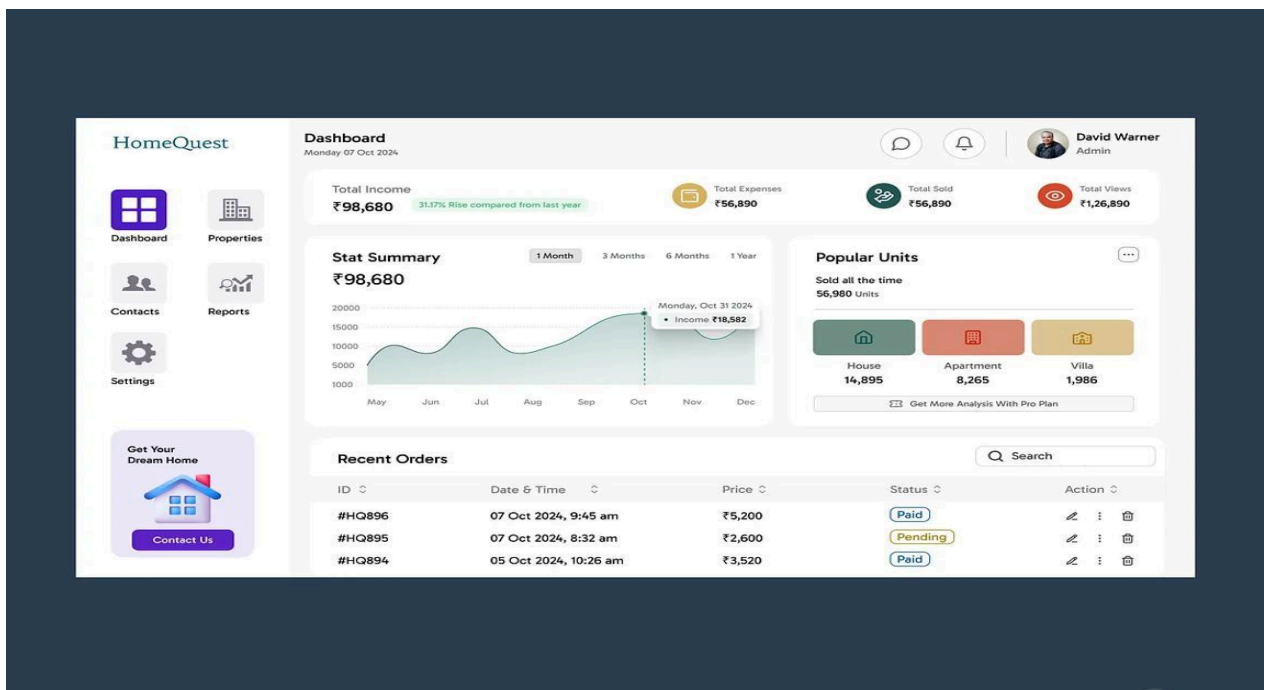

Description

The **Renter** is responsible for searching available rental properties, viewing property details, and submitting booking requests.

Responsibilities

- Register and Login
- Browse Rental Properties
- View Property Details
- Submit Booking Requests
- Track Booking Status

3. Owner

Description

The **Owner** manages rental property listings and booking requests. The Owner can access these features only after receiving approval from the Admin.

Responsibilities

- Register as Owner
- Add Property
- Update Property Details
- Delete Property
- Manage Booking Requests
- Update Property Availability

4. Admin

Description

The **Admin** supervises the entire application by verifying owners, managing users, monitoring property listings, and maintaining platform security.

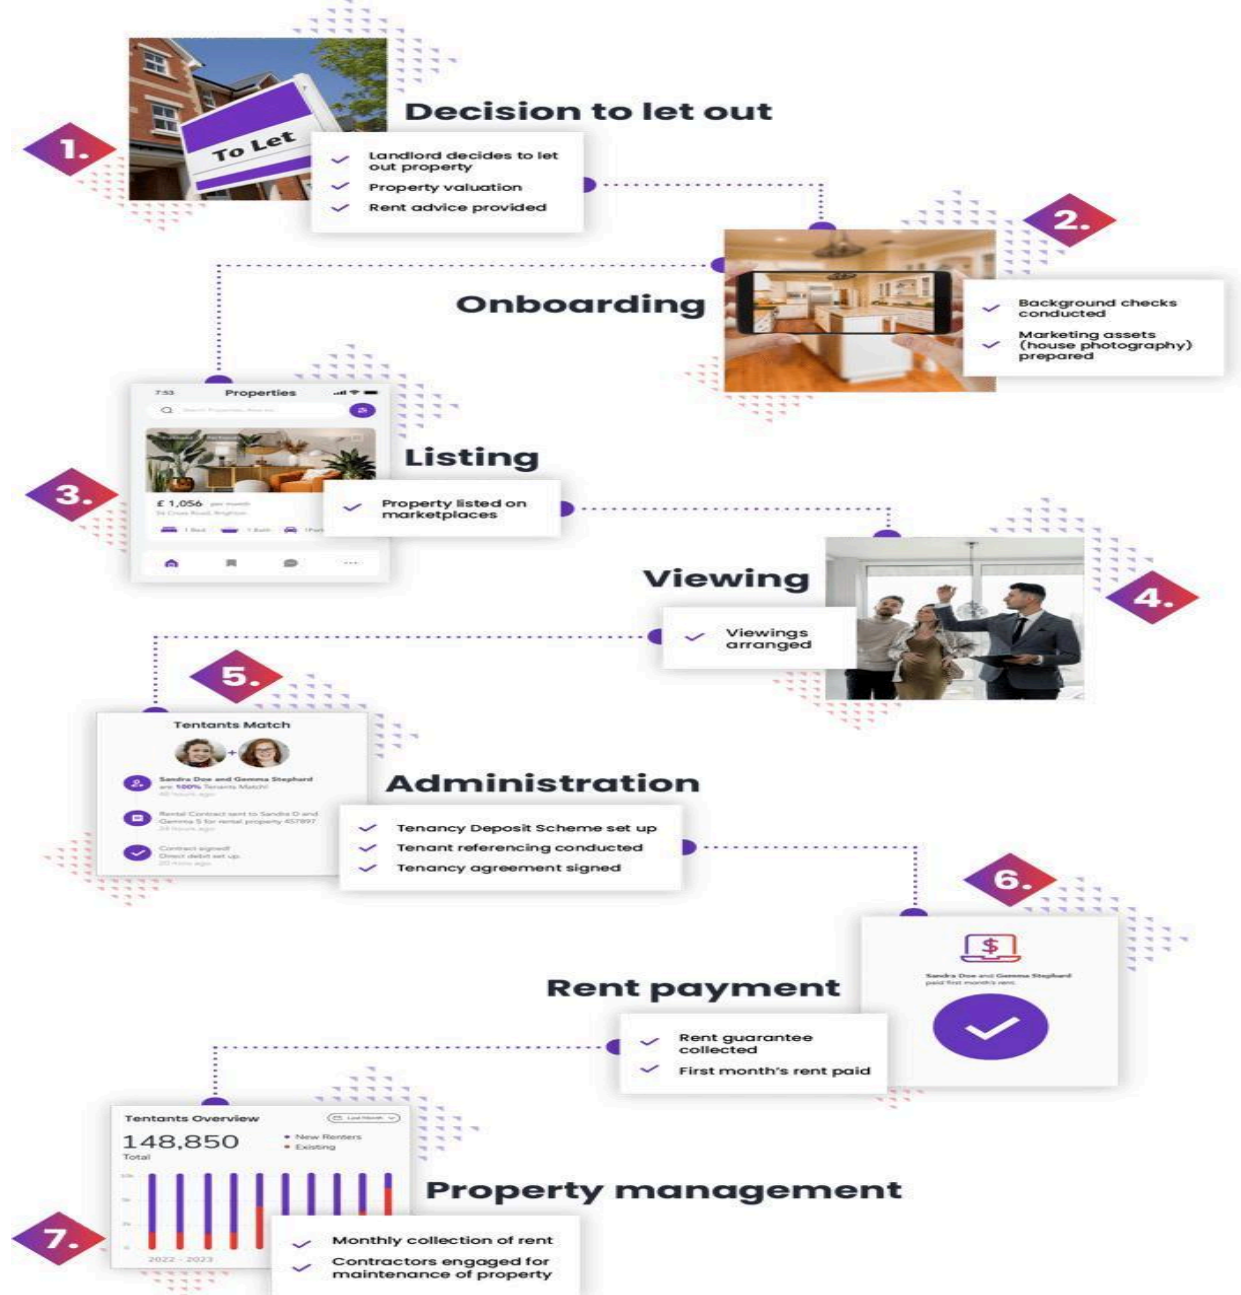

Responsibilities

- Verify Owner Accounts
- Approve or Reject Registrations
- Manage Users
- Monitor Properties
- Enforce Platform Policies
- Maintain System Security

5. Overall Interaction

Rental Journey

from a landlord's perspective

Send Host a Booking Request

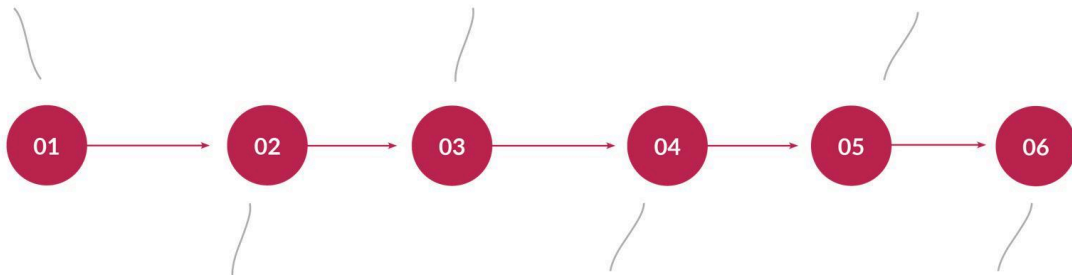

Send a booking request for a property that meets your stay requirements

Complete Background Check

After the due at booking payment is made, users will complete the free background check

Sign the Housestay Lease

Once all resident information has been confirmed, all users will be required to sign the HouseStay lease

Make Due at Booking Payment

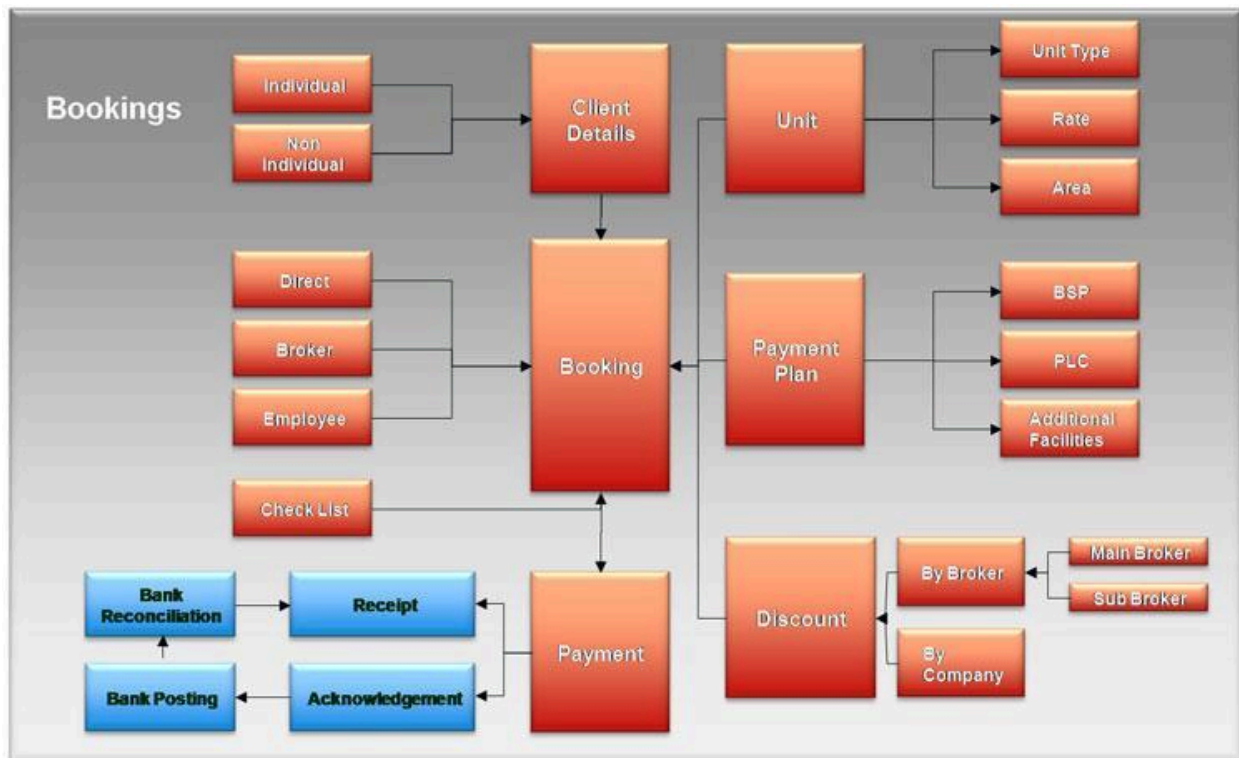

Once a host accepts the request users have 24 hours to make the due at booking payment

Confirm Resident Information

Confirm all the information for the users who will be staying in the accommodations

Move In & Enjoy Your Stay

After your booking has been confirmed, you will be connected directly with your host to coordinate your move in

Workflow
