

Project Design Phase-II Data Flow Diagram & User Stories

Date	27 June 2026
Team ID	
Project Name	House Rent
Maximum Marks	4 Marks

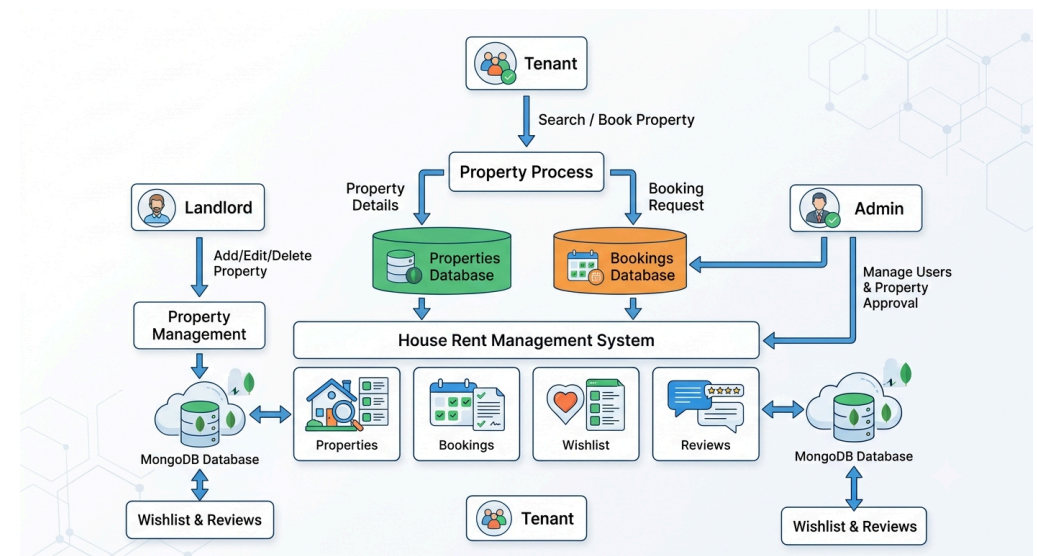

Data Flow Diagrams:

A **Data Flow Diagram (DFD)** is a graphical representation of how data moves through the House Rent Management System. It illustrates how users interact with the system, how information is processed, and where data is stored. The DFD helps understand the overall functionality of the application by showing the movement of data between external entities, processes, and the database.

Example: [\(Simplified\)](#)

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Tenant	Registration	USN-1	As a tenant, I can register by entering my name, email, phone number, and password.	I can successfully create my account and access the system.	High	Sprint-1
Tenant	Login	USN-2	As a tenant, I can login across my email and password.	I can successfully access my dashboard.	High	Sprint-1
Tenant	Search Properties	USN-3	As a tenant, I can search rental properties using location, rent, and property type filters.	Matching properties are displayed based on my search filters.	High	Sprint-1
Tenant	View Property Details	USN-4	As a tenant, I can view complete details of a selected property.	Property properties, images, and owner details are displayed.	High	Sprint-2
