

Project Development Phase Model Performance Test

Date	06 July 2026
Team ID	
Project Name	House Rent
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Metrics	Regression Model: Not Applicable (N/A) – The project does not use a regression model. Classification Model: Not Applicable (N/A) – The project does not use a machine learning classification model. Instead, the system was evaluated using functional testing, authentication testing, CRUD operation testing, database performance, and response time.	 The Booking History section enables users to track all their property visit bookings along with their booking status, scheduled date, and time slot. It also displays the landlord's contact information and the user's booking message, allowing easy communication and efficient management of visit requests.
2.	Tune the Model	Hyperparameter Tuning: Not Applicable (N/A). Validation Method: Functional Testing, Integration Testing, Performance Testing, and User Acceptance Testing (UAT) were conducted to validate the application's functionality and performance.	 The Booking History section enables users to track all their property visit bookings along with their booking status, scheduled date, and time slot. It also displays the landlord's contact information and the user's booking message, allowing easy communication and efficient management of visit requests.
